Computer Engineering
University of Colorado 425
Boulder, CO 80309

OPERATING SYSTEMS REVIEW is an informal quarterly publication of the ACM Special Interest Group on Operating Systems (SIGOPS), whose scope of interest includes: Computer operating systems and architecture for multiprogramming, multiprocessing, and time sharing; resource management; evaluation and simulation; reliability, integrity, and security of data; communications among computing processors; and computer system modeling analysis.

Membership in SIGOPS (at \$8 per annum) is open to ACM members and associate members, and student members (at \$4 per annum); non-ACM members may join also (at \$22 per annum). Non-members of SIGOPS may subscribe to OPERATING SYSTEMS REVIEW at \$14 per year. All SIGOPS members received OPERATING SYSTEMS REVIEW.

SIGOPS membership application forms are available from ACM Headquarters (or see back cover of this issue), 11 West 42nd Street, New York, New York 10036, telephone (212) 869-7440. Changes of address and other matters pertaining to the SIGOPS mailing list should be directed to ACM Headquarters, not to any of the SIGOPS officers.

Contributions to OSR should be sent to the editor, should not ordinarily exceed 1000 words, and should be single-spaced within a 6½ inch by 8½ inch box with at least one inch top and side (1½ inch bottom) margins and in camera-ready form. All letters to the editor will be considered for publication unless accompanied by a request to the contrary. Except for editorial items, all sources of material appearing in OPERATING SYSTEMS REVIEW will be clearly identified. Items attributed to individuals will ordinarily be interpreted as personal rather than organizational opinions. The technical material in this newsletter is not refereed. Deadlines for submitting material are the 14th of March, June, September, and December.

Ninth ACM Symposium on Operating Systems Principles

General Chairman

Jerome Saltzer *Massachusetts Institute of Technology*

Program Co-Chairmen

Roy Levin *Xerox*

David Redell *Xerox*

Program Committee

David Clark *Massachusetts Institute of Technology*

James Gray *Tandem Computers*

Keith Lantz *Stanford University*

John Ousterhout *University of California, Berkeley*

Fred Schneider *Cornell University*

Alfred Spector *Carnegie-Mellon University*

Kenneth Thompson *Bell Laboratories*

John Zahorjan *University of Washington*

Symposium Staff

Secretary: Muriel Webber *Massachusetts Institute of Technology*

Treasurer: David Clark *Massachusetts Institute of Technology*

Meeting Site: Robert Graham *University of Massachusetts*

Printed Materials: David Reed *Massachusetts Institute of Technology*

Registration: Butler Lampson *Xerox*

European Liaison: Liba Svobodova *IBM*

Referees

Unlike most previous SOSPs, the 9th SOSP has relied almost entirely on the Program Committee to review submitted papers. There were some cases in which outside referees were used, however, and we wish to acknowledge their important contribution to the Symposium.

FOREWORD

The Ninth Symposium on Operating System Principles continues the tradition of its eight predecessors by reporting on significant original work in the field. The papers in this proceedings range from design proposals to implementation lessons, from storage allocation to security verification, from data storage to communication protocols. While many focus on topics and issues in distributed systems, the papers as a whole are indicative of the true breadth of the field.

The strong technical history of these symposia and their relative infrequency (bi-annual) exerted considerable influence on the makeup of the program committee and on the reviewing process for the submitted papers. Ten committee members, displaying wide technical diversity, were chosen from six academic institutions and three industrial organizations. More than half were serving on an SOSP program committee for the first time. Departing from the approach followed in recent years, the committee members decided to review most of the papers themselves, consulting outside referees in those cases where special expertise was needed. A two round reviewing process was employed, ensuring that at least three committee members read each submission and that most members read most of the papers. The committee was thus very well informed when it met and selected sixteen papers from a field of eighty-three for inclusion in the symposium. Three outstanding papers were nominated and subsequently accepted for publication in a special issue of the ACM Transactions on Computer Systems. A fourth paper was independently submitted to and accepted by TOCS. In accordance with ACM policy, only extended abstracts of these papers appear in the proceedings.

A good technical program is necessary but not sufficient for a successful conference. In addition to the program committee and other symposium officials, we wish to thank Kathi Anderson, Shannon McElyea, and Muriel Webber, whose diligence and care have greatly contributed to the quality of this conference.

Roy Levin and Dave Redell
Program Committee Co-Chairmen
August, 1983

Ninth ACM Symposium on Operating Systems Principles

11 October 1983

Session I: Communication

- Computation and Communication in R*: A Distributed Database Manager* 1
(ABSTRACT ONLY*)
B.G. Lindsay, L.M. Haas, C.Mohan, P.F. Wilms and R.A. Yost
- Implementing Remote Procedure Calls* 3
(ABSTRACT ONLY*)
A. D. Birrell and B. J. Nelson
- An Asymmetric Stream Communication System* 4
A. P. Black

Session II: Resource Management

- Resource Management in a Decentralized System* 11
D. H. Craft
- A File System Supporting Cooperation Between Programs* 20
L. Guarino Reid and P. L. Karlton
- Fast Fits: New Methods for Dynamic Storage Allocation* 30
(ABSTRACT ONLY*)
C. J. Stephenson

Session III: Special Session

- Hints for Computer System Design* 33
B. W. Lampson

12 October 1983

Session IV: LOCUS

The LOCUS Distributed Operating System 49
B. Walker, G. Popek, R. English, C. Kline and G. Thiel

A Nested Transaction Mechanism for LOCUS 71
E. T. Mueller, J. D. Moore, and G. J. Popek

Session V: Work in Progress

A series of short presentations describing projects currently in progress.

Session VI: Recovery and Reconfiguration

A Message System Supporting Fault Tolerance 90
A. Borg, J Baumbach, and S. Glazer

Publishing: A Reliable Broadcast Communication Mechanism 100
M. L. Powell and D. L. Presotto

Process Migration in DEMOS/MP 110
M. L. Powell and B. P. Miller

Session VII: Debate

RESOLVED: *That network Transparency is a Bad Idea*

13 October 1983

Session VIII: Distributed File Access

The TRIPOS Filing Machine, a Front End to a File Server. 119
M. F. Richardson and R. M. Needham

The Distributed V Kernel and its Performance for Diskless Workstations. 128
D. R. Cheriton and W. Zwaenepoel

Session IX: Experience

Experience with Grapevine: The Growth of a Distributed System 140
(ABSTRACT ONLY*)
M. D. Schroeder, A. D. Birrell, and R. M. Needham

Reflections on the Verification of the Security of an Operating System Kernel 142
J. Silverman

* In keeping with ACM publication policy, papers that will appear in the ACM Transactions on Computer Systems are reprinted here in extended abstract form only.
